

alexluycckx|photography

Thank you for choosing alexluycckx|photography to process your black and white film. You can be assured that we will treat your film as if it is a roll or sheet of film that we ourselves have shot for our own project or for a client. . If no chemistry is selected we will use Xtol by default. Scanning is done on an Epson V700 scanner at 2400dpi (1200dpi for 4x5) and come in a TIFF format. Scanned files are delivered to the client via a dropbox link sent to the specified email account. Payment is accepted through Paypal (if Paypal is selected we will generate an invoice upon receiving your processing order) or cheque/money order.
